

# MEMail

“Microsoft Exchange without the servers, staff and headaches.”

“93% of organisations have had a virus, worm or Trojan Horse successfully infiltrate their network through email.”  
Osterman Research, Inc.

## KEY BENEFITS

- Cost-effective and scalable
- Free up IT resources and reduce costs
- Increase employee productivity and control
- Benefit from Threat Centre’s around-the-clock protection
- Microsoft Exchange 2010 in a fully hosted environment

## SERVICE FEATURES

- Outlook and web email
- Spam blocking
- Fraud protection
- Virus and worm scanning
- Content and attachment filtering
- Outbound message filtering
- Policy-based management
- Secure message delivery via Transport Layer Security
- Sophisticated Quarantine Management

## THE ALL-IN-ONE MAILBOX

geeit MEMail is a cost effective and scalable Microsoft Exchange solution that safeguards you from email threats that put your network at risk. Access your mailbox from Outlook or any web browser, and take control of features such as Email Quarantine and Message Continuity to ensure only the emails you want get delivered, even when your Exchange Server is unavailable.

## KEEP EXCHANGE, LOSE THE SERVER!

### ONSITE DEPLOYMENT & LOCAL HELP DESK

geeit MEMail clients are supported by our local service desk based in Sydney.

### CONTACTS, MAIL & CALENDARS ALL BACKED UP AUTOMATICALLY

geeit MEMail operates a fully redundant, backed up and fail-safe environment to keep your email, contacts and calendar items safe in case you lose your laptop or mobile device.

### COST EFFECTIVE

Onsite Exchange Servers can be expensive to setup, maintain and scale as your business grows. Costly disk space, computing resources and skilled IT resources are required to maintain and manage your mail infrastructure. On top of that, hardware upgrades, disk management, licensing requirements and operating costs all add up. geeit MEMail offers an alternative solution that is both effective and affordable.

## WHY EXCHANGE 2010?

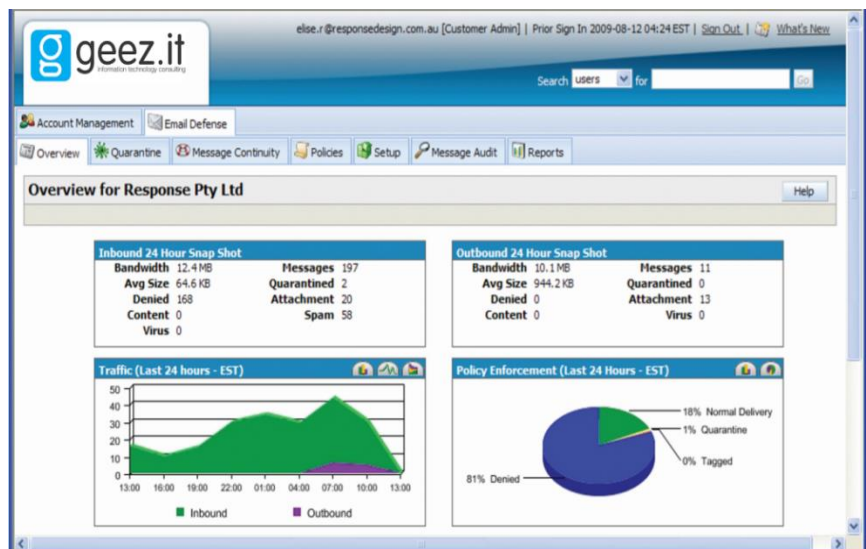

The largest and most successful companies in the world trust Microsoft Exchange 2010 to maintain their organisation’s email. They use Exchange to optimise their most valuable asset - their people; so they can perform at their best without the boundaries of the office, or their laptop - without outage, headaches and unnecessary complexity.

## 100% AUSTRALIAN OWNED AND HOSTED

geeit MEMail is a true Microsoft Exchange high availability deployment, 100% hosted in Australia on ZettaGrid, ‘Australia’s Fastest Cloud’ and VMware, partner of the year 2012.

## BUSINESS GRADE EMAIL ANTI-SPAM & ANTI-VIRUS

Central to geeit MEMail’s effectiveness is its Stacked Classification Framework spam detection system, which utilises a patented method of identifying and controlling spam with a sophisticated voting algorithm. This achieves more than 99% accuracy – a technique that results in highly accurate threat protection with industry-leading low false positive rates (that is, less legitimate emails mistaken as spam). Every email is scanned by Authentium®, McAfee® and Sophos® virus protection and our WormTraq intercepts zero-hour mass mailing worms.

## ABOUT GEEZIT

With over 15 years experience in the IT industry we understand what our clients are looking for. Our clients are seeking technology and IT solutions that are efficient, cost effective and easy to use.

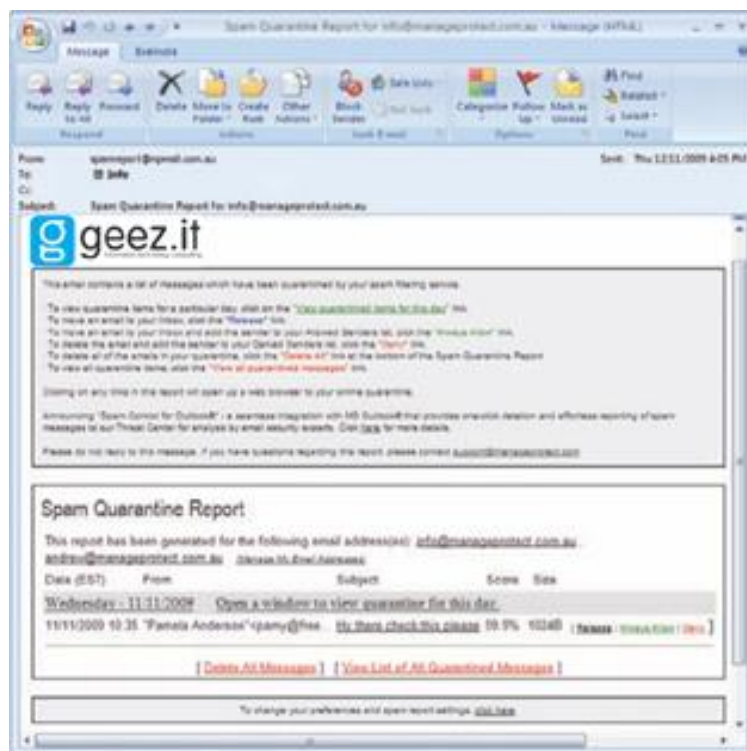

geezip tailor solutions to meet your needs. We are experienced at working with businesses that have limited IT know-how as well as working closely with clients who have in-house IT support.

Our suite of cloud-based managed services deliver true business grade, best-of-breed solutions focused on making business use of the internet (email, web and messaging) simple, secure and reliable.

Our approach is flexible, allowing us to accommodate a wide range of business needs. We are able to scale our solutions to fit your business requirements and in turn, we can deliver the best possible solution for you and your business.

We have expanded the support services and network services area of our business to accommodate the trend towards outsourcing some or all of a business's IT department.

**For more information about geezip MEMail or other geezip cloud based services, contact us on 1300 433 948.**

## SOPHISTICATED QUARANTINE MANAGEMENT

Once emails have been filtered, suspect messages are stored in a safe, external quarantine on the customers' behalf, in an off-site queue accessible by corporate IT departments, employees or both. If the customer chooses to allow its employees to manage their own quarantine, geezip MEMail sends a "Spam Quarantine Report" to the employees' email inbox. Our quarantine management allows end users to determine how items captured by the filter should be handled in the future.

## EMAIL ACCESS DURING OUTAGES

During an email outage, your staff can continue to communicate from their existing email addresses with integrated webmail. Once connectivity has been restored, all outage-period email activity is intelligently synchronised with your primary system. With geezip MEMail Disaster Recovery Services you can be confident that no matter whenever "it" happens – and "it" will – your business is protected.

## CONTENT FILTERING

### GEEZIT MEMAIL FRAUD & PHISHING PROTECTION

With geezip MEMail Fraud Protection, organisation's users are protected from fraudulent phishing emails which attempt to dupe unsuspecting recipients into releasing personal or business-related information. geezip MEMail's multi-layered filtering protects your employees from releasing sensitive information to phishers using the geezip MEMail ClickProtect feature. With ClickProtect, businesses can choose to enable or disable URL click-throughs from email, or display a warning message before allowing or denying the click.

Our Threat Centre provides around-the-clock proactive defence against the latest phishing attacks.

### GEEZIT MEMAIL CONTENT & ATTACHMENT FILTERING

- Automatic filtering identifies and blocks unwanted, inappropriate and malicious content in body copy and attachments before it enters or leaves your organisation.
- HTML shield blocks intrusive spam beacons and web bugs.
